Stock program - **UNC National coarse**

Specially for the USA we also produce UNC - Unified National Coarse. The use of European manufactured low carbon steel ensures a stable constant quality of the threaded rod. This combined with high automated production technologies we ensure a constant reliable quality.

Special packaging requirements for the US are upon your request. Or meet our private label packaging possibilities, with less waste on construction site.

## Private label packaging

Worldwide many types of packaging are available for threaded rods, complete wrapped in plastic, bundled with metal wire, bundles with straps etc.

Bodegraven Metal offers you unique private label packaging to boost your brandname. This private label packaging is available from 500T annual.

**Please contact us for the possibilities.**
